

Nelson Pohgline Personal Research

A human trial of Compound C

Subject: Nelson Pohgline

Age 25 Weight: 178

Assuming that one spider bite contains approximately 0.0010 mL of toxin; the amount of anti-toxin required to counteract 3 spider bites is 25 mg of Compound C. I will begin my dosage at 25 mg of Compound C.

INITIAL HEALTH REPORT (05.16.02)	
Heart Rate	85 bpm
Temperature	98.4 F
Blood pressure	110/70

DAY 1 (05.17.02)	
Dosage: spider anti-toxin (mg)	25
Heart Rate (bpm)	82
Temperature (F)	98.4
Blood pressure	110/70
Side Effects/ Notes	No noticeable side effects

DAY 2 (05.18.02)	
Dosage: spider anti-toxin (mg)	25
Heart Rate (bpm)	84
Temperature (F)	99.1
Blood pressure	112/70
Anti-toxin in urine (mg)	12.4
Notes	Side effects: mild fever,

DAY 6 (05.22.02)	
Dosage: spider anti-toxin (mg)	25
Heart Rate (bpm)	83
Temperature (F)	99.2
Blood pressure	112/70
Anti-toxin in urine (mg)	12.3
Notes	Amt of anti-toxin in urine appears to be roughly 50% after 24 hours. Besides slight fever, no major side effects. Going to try increasing dosage.

DAY 13 (05.29.02)	
Dosage: spider anti-toxin (mg)	35
Heart Rate (bpm)	89
Temperature (F)	99.3
Blood pressure	120/79
Anti-toxin in urine (mg)	17.6
Notes	Fever only slightly increasing. Occasional blurred vision. Tests going well.

DAY 14 (05.30.02)	
Dosage: spider anti-toxin (mg)	35
Heart Rate (bpm)	83
Temperature (F)	98.9
Blood pressure	115/74
Anti-toxin in urine (mg)	17.6
Notes	Received one spider bite. Mild redness and swelling around the bite. Increased heart rate and blood pressure for 9 minutes, slight nausea and a mild fever (100.6) for approx. 3 hours.

DAY 15 (05.31.02)	
Dosage: spider anti-toxin (mg)	35
Heart Rate (bpm)	86
Temperature (F)	98.9
Blood pressure	115/74
Anti-toxin in urine (mg)	8.8
Notes	Swelling has decreased; amount of anti-toxin in urine has decreased as well.

DAY 16 (06.01.02)	
Dosage: spider anti-toxin (mg)	35
Heart Rate (bpm)	92
Temperature (F)	99.2
Blood pressure	122/78
Anti-toxin in urine (mg)	17.2
Notes	3 spider bites. More swelling than before (probably because bites were close by each other), Increased heart rate and blood pressure for 20 minutes, great nausea and a fever (101.6) for approx. 1 hours.
